Business Solutions Under One Roof

About e-Business International

e-Business International was founded in 1999 as an IT consulting and development firm, providing business services to companies within the United States. Fueled by dramatic growth and inspired by the trend of global outsourcing, we set our sights on global expansion. Opened offices at Trichy (India) in 2001. Since then, e-Business International has capitalized on the extensive IT resources of Trichy, merging the powerful business environments of India and the United States.

e-Business International has grown at the rapid rate of 100 percent every year.

Our expansive networks throughout the United States and India have helped us build a culturally diverse work force that is strong enough to provide services to mid-market clients and many Fortune 100 companies.

We have played a positive role in the continued growth of U.S. and Indian markets.
